Profile

I am a highly motivated and skilled Junior Web Developer with a passion for creating engaging and user-friendly websites.

I am using a MERN stack. I am looking for a challenging position where I can contribute my technical knowledge and work with a team to deliver innovative web solutions. Ready to learn new technologies and programming languages. I aim to successfully complete tasks.

PET Projects

E-commerce cloth shop

06/2023–08/2023

The store was created using the MERN stack.

For API testing, POSTMAN was used.

- A database was designed and created in MongoDB-this is where information about products, registered customers is stored.
- User interface design.
- Server creation in Express.js and Node.js.

Calories Tracker

03/2023–04/2023

Calories Tracker is a simple web application that allows users to track their daily calorie intake. It provides an easy-to-use interface for entering meals and keeps a record of the calories consumed throughout the day.

Features
- Add meals: Users can enter details about each meal, including the name and calorie count.
- Track calorie intake: The application calculates and displays the total calories consumed for the day.
- Edit and delete meals: Users have the ability to update or remove previously entered meals.
- Goals and targets: Users can set daily calorie goals and track their progress towards achieving them.

Technologies Used
- Frontend: HTML, SCSS, JavaScript
- Database: LocalStorage
- Module bundler: Webpack

Education

Skills
